

API Reference

- [Products](#)
- [Ads](#)
- [Content API for Shopping](#)
- [Reference](#)

This API reference is organized by resource type. Each resource type has one or more data representations and one or more methods.

Resource types

1. [Accounts](#)
2. [Accountstatuses](#)
3. [Accounttax](#)
4. [Datafeeds](#)
5. [Datafeedstatuses](#)
6. [Inventory](#)
7. [Orders](#)
8. [Products](#)
9. [Productstatuses](#)
10. [Shippingsettings](#)

Accounts

For Accounts Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
authinfo	GET /accounts/authinfo	Returns information about the authenticated user.
claimwebsite	POST /merchantId/accounts/accountId/claimwebsite	Claims the website of a Merchant Center sub-account.
custombatch	POST /accounts/batch	Retrieves, inserts, updates, and deletes multiple Merchant Center (sub-)accounts in a single request.
delete	DELETE /merchantId/accounts/accountId	Deletes a Merchant Center sub-account.
get	GET /merchantId/accounts/accountId	Retrieves a Merchant Center account.
insert	POST /merchantId/accounts	Creates a Merchant Center sub-account.
list	GET /merchantId/accounts	Lists the sub-accounts in your Merchant Center account.
patch	PATCH /merchantId/accounts/accountId	Updates a Merchant Center account. This method supports patch semantics.
update	PUT /merchantId/accounts/accountId	Updates a Merchant Center account.

Accountstatuses

For Accountstatuses Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /accountstatuses/batch	
get	GET /merchantId/accountstatuses/accountId	Retrieves the status of a Merchant Center account.
list	GET /merchantId/accountstatuses	Lists the statuses of the sub-accounts in your Merchant Center account.

Accounttax

For Accounttax Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /accounttax/batch	Retrieves and updates tax settings of multiple accounts in a single request.
get	GET /merchantId/accounttax/accountId	Retrieves the tax settings of the account.
list	GET /merchantId/accounttax	Lists the tax settings of the sub-accounts in your Merchant Center account.
patch	PATCH /merchantId/accounttax/accountId	Updates the tax settings of the account. This method supports patch semantics.
update	PUT /merchantId/accounttax/accountId	Updates the tax settings of the account.

Datafeeds

For Datafeeds Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /datafeeds/batch	
delete	DELETE /merchantId/datafeeds/datafeedId	Deletes a datafeed configuration from your Merchant Center account.
get	GET /merchantId/datafeeds/datafeedId	Retrieves a datafeed configuration from your Merchant Center account.
insert	POST /merchantId/datafeeds	Registers a datafeed configuration with your Merchant Center account.
list	GET /merchantId/datafeeds	Lists the datafeeds in your Merchant Center account.
patch	PATCH /merchantId/datafeeds/datafeedId	Updates a datafeed configuration of your Merchant Center account. This method supports patch semantics.
update	PUT /merchantId/datafeeds/datafeedId	Updates a datafeed configuration of your Merchant Center account.

Datafeedstatuses

For Datafeedstatuses Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /datafeedstatuses/batch	

Method	HTTP request	Description
get	GET <i>/merchantId/datafeedstatuses/ datafeedId</i>	Retrieves the status of a datafeed from your Merchant Center account.
list	GET <i>/merchantId/datafeedstatuses</i>	Lists the statuses of the datafeeds in your Merchant Center account.

Inventory

For Inventory Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST <i>/inventory/batch</i>	Updates price and availability for multiple products or stores in a single request. This operation does not update the expiration date of the products.
set	POST <i>/merchantId/inventory/storeCode/products/productId</i>	Updates price and availability of a product in your Merchant Center account.

Orders

For Orders Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
acknowledge	POST <i>/merchantId/orders/orderId/acknowledge</i>	Marks an order as acknowledged.
advancetestorder	POST <i>/merchantId/testorders/orderId/advance</i>	Sandbox only. Moves a test order from state "inProgress" to state "pendingShipment".
cancel	POST <i>/merchantId/orders/orderId/cancel</i>	Cancels all line items in an order, making a full refund.
cancellineitem	POST <i>/merchantId/orders/orderId/cancelLineItem</i>	Cancels a line item, making a full refund.
createtestorder	POST <i>/merchantId/testorders</i>	Sandbox only. Creates a test order.
custombatch	POST <i>/orders/batch</i>	Retrieves or modifies multiple orders in a single request.
get	GET <i>/merchantId/orders/orderId</i>	Retrieves an order from your Merchant Center account.
getbymerchantorderid	GET <i>/merchantId/ordersbymerchantid/merchantOrderId</i>	Retrieves an order using merchant order id.
gettestordertemplate	GET <i>/merchantId/testordertemplates/templateName</i>	Sandbox only. Retrieves an order template that can be used to quickly create a new order in sandbox.
list	GET <i>/merchantId/orders</i>	Lists the orders in your Merchant Center account.
refund	POST <i>/merchantId/orders/orderId/refund</i>	Initiates a full or partial reversal on the payment instrument.
returnlineitem	POST <i>/merchantId/orders/orderId/returnLineItem</i>	Returns a line item.
shiplineitems	POST <i>/merchantId/orders/orderId/shipLineItems</i>	Marks line item(s) as shipped.
updatemerchantorderid	POST <i>/merchantId/orders/orderId/updateMerchantOrderId</i>	Updates the merchant order ID for a given order.
updateshipment	POST <i>/merchantId/orders/orderId/updateShipment</i>	Updates a shipment's status, carrier, and/or tracking ID.

Products

For Products Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /products/batch	Retrieves, inserts, and deletes multiple products in a single request.
delete	DELETE /merchantId/products/productId	Deletes a product from your Merchant Center account.
get	GET /merchantId/products/productId	Retrieves a product from your Merchant Center account.
insert	POST /merchantId/products	Uploads a product to your Merchant Center account. If an item with the same channel, contentLanguage, offerId, and targetCountry already exists, this method updates that entry.
list	GET /merchantId/products	Lists the products in your Merchant Center account.

Productstatuses

For Productstatuses Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /productstatuses/batch	Gets the statuses of multiple products in a single request.
get	GET /merchantId/productstatuses/productId	Gets the status of a product from your Merchant Center account.
list	GET /merchantId/productstatuses	Lists the statuses of the products in your Merchant Center account.

Shippingsettings

For Shippingsettings Resource details, see the [resource representation](#) page.

Method	HTTP request	Description
URIs relative to https://www.googleapis.com/content/v2 , unless otherwise noted		
custombatch	POST /shippingsettings/batch	Retrieves and updates the shipping settings of multiple accounts in a single request.
get	GET /merchantId/shippingsettings/accountId	Retrieves the shipping settings of the account.
getsupportedcarriers	GET /merchantId/supportedCarriers	Retrieves supported carriers and carrier services for an account.
list	GET /merchantId/shippingsettings	Lists the shipping settings of the sub-accounts in your Merchant Center account.
patch	PATCH /merchantId/shippingsettings/accountId	Updates the shipping settings of the account. This method supports patch semantics.
update	PUT /merchantId/shippingsettings/accountId	Updates the shipping settings of the account.
